CCoE Hub — Complete Workforce Offering Inventory

Prepared for CISO review · 4 OCT 2026 · Full sweep: all 24 pages, every section, card, tool, download, and link. No truncation.

Purpose: decision inventory for the minimally-viable deployment (+ .mil GitLab transition). Use the KEEP / MERGE / CUT marks to decide what stays in the release.

A. PORTAL ENTRANCES & ORIENTATION

A1. Home Page (`index.html`)

Offering	What the workforce gets	Keep?
Hero: "From document repository to command center" + mission framing	Sets the narrative that compliance is the floor, risk-aware enablement is the standard	KEEP (it's the brand)
Hero stats — 84 systems / 71 ATOs / 12 in queue / 9 expiring	Instant portfolio size; animates on load	KEEP (edit monthly via site-metrics.json)
CYBER ALERTS ticker	Scrolling band: KEV acts-now, eMASS baseline changes, policy updates, deadlines, phishing advisories; newest CISA KEV auto-inserted	KEEP
Today's Operating Picture	CISO standing message + mission statement, effective/review dates, approval chain	KEEP
CISO Standing Message block	One voice from leadership; quarterly refresh	KEEP (owner: you)
Metrics Snapshot — Portfolio ATO Health 84%, Open POA&M 312, In Assessment Queue 12, High-Risk Systems 6 (deltas + color tones)	The 30-second posture read	KEEP
Authorization Status Mix (donut: Full 58 / Conditional 7 / IATT 4 / ATC 2 / Expiring 9 / In Process 4)	Composition of the authorization base	KEEP
Open POA&M by Severity (bars: 23/96/141/52)	Where the risk reduction work actually sits	KEEP
Command Emphasis (current priorities: renewals, inspection focus, cloud governance shift, 8140 tracker, KEV remediation)	What leadership wants attention on *this month*	KEEP
Upcoming Events list (6 nearest events w/ links)	Next obligations	REVIEW — replace w/ expirations post-transition
Role-Based Entry Points (8 role cards: ISSM, ISSO, SCA, SO/PM, ENG, CISO/AODR, CTR, New)	Every persona lands on *their* tasks, not a generic sitemap	KEEP — signature feature
Quick Links Engine (10 direct pathways: eMASS, interactive tools, policies, templates, SOPs, dashboards, glossary, references)	One-click depth from home	KEEP
Phased Implementation Roadmap (10 phase cards)	The rollout plan itself, all phases marked live	CUT or compress — post-deploy this meta-content serves nobody

A2. FAQ & Knowledge Base (`faq.html`) — 207 answers (verified count)

Offering	Detail
Answers mode	207 searchable FAQ answers from 6 modules: site (01), RMF (02), incident (03), workforce (04–05), general (06)

Offering	Detail
Site mode	Full-site index search across all 24 pages (pages.json: every page has title, summary, keywords, section map)
CCoE Glossary	Authoritative acronyms: AO, AODR, ACAS, ATO-C, CCI, CUI, FedRAMP, IATT, IL, ISSM, ISSO, POA&M, RAW, RMF, SAR, SCA, SSP, STIG + more; searchable/sortable
Self-triage value	The #1 deflection tool — most "who do I ask" questions die here

A3. Contact (`contact.html`)

Offering	Detail
Routing directory table (Topic / Channel / Response SLA)	Who handles what: FrontDesk, AODR, Vuln Cell, eMASS Support, Acq Cyber, ARB Intake, Workforce, Knowledge Mgr
Ask the CISO (anonymous)	Direct anonymous channel; answered live last-Friday monthly session or within 2 weeks; general-interest answers publish to FAQ + weekly digest
General inquiry form	Prefilled mailto to office box (currently placeholder `usarmy.ccoe.office@army.mil` — replace w/ real box)
Incident bypass note	Explicit "incidents do NOT use this page" routing

B. RMF / OPERATIONS CORE

B1. RMF Operations Hub (`rmf-operations.html`)

Offering	Detail
The Seven Steps (Prepare→Categorize→Select→Implement→Assess→Authorize→Monitor)	Lifecycle skeleton with deep content per step
10 authorization pathway cards: Full ATO, IATT, Conditional ATO, ATC Only, Assess-Only, Standalone Systems, Closed-Restricted Networks, Agile ATO/Continuous Auth, ATO Extension, Reciprocity	Which path fits which situation — each a card w/ job aid
Job aids & checklists (downloads: AO Package Routing Checklist, Artifact Checklists by Control Family FULL-SET xlsx, Assessment Readiness Package, FIPS-199 Categorization Worksheet, RMF Process Map PDF, Cybersecurity-101 trio)	The working paper trail
Cybersecurity 101 primers (Process Guide PDF, Reference Sheet PDF, Presentation PPTX)	Onboarding artifacts for the "NEW" persona

B2. Vulnerability & POA&M Management (`vulnerability-poam.html`)

Offering	Detail
The SLA clock (KEV 7d / CAT I 15d / CAT II 30d / Medium 90d / Low 180d)	The rules of the engagement clock
Open POA&M aging dashboard (10 live rows from poam.json w/ status: overdue/at-risk/on-track/review)	Named-system findings — ⚠ CUI-TIER ONLY after transition; public side must be aggregate counts
Finding→verified-closure engine + evidence rules + escalation triggers	The process backbone
Standardized entry + battle rhythm + scan cadence guidance	ConMon discipline

B3. Assessment & Authorization Calendar (`assessment-calendar.html`)

Offering	Detail
Expiration Radar (9 systems w/ pathway, days-left, stage, ISSO, track)	⚠ Named systems w/ dates+owners = CUI-TIER detail; public side must aggregate ("6 systems inside 180d")

Offering	Detail
Month-grid view of events (June 2026: assessments, trainings, blackouts, decisions)	Post-transition: you want EXPIRATIONS ONLY — the grid drops to system-expiry markers
Hard milestones + auto-built .ics downloads (6 .ics today incl. ccoe-all-events.ics)	Outlook integration
6 downloads (calendar .ics set)	Same

B4. Threat Intelligence (`threat-intel.html`)

Offering	Detail
This Week's Threat Picture (weekly cards from threat-week.json)	Monday-morning refresh narrative
KEV→Portfolio map (which named systems each KEV touches)	⚠ Named-system exposure — public side aggregate only
Raw source feeds (auto-updated twice daily: CISA KEV 1,739 entries, NVD CRITICAL 7d, MSRC CVRF, Ubuntu+Red Hat notices, Nessus plugins)	**Pipeline now FIXED & running** (was 116-day stale; auto-refresh workflow restored 4 OCT)
ATT&CK techniques mapped to weak points	Threat-informed self-assessment lens

C. LEADERSHIP & GOVERNANCE

C1. Governance & Leadership (`governance.html`)

Offering	Detail
Oversight Authority Model	Who decides what, explicit
Cyber Governance Board (CGB)	Charter/composition of the decision body
RACI tiles (RMF / changes / incidents / vulnerabilities)	"Responsible/Accountable/Consulted/Informed" per process
"If It Wasn't Recorded, It Wasn't Decided"	The decision-recording rule ⚠ no decision-log artifact exists yet — add decisions.json (recommendation)
Portfolio-in-One-Screen dashboards (ATO mix, POA&M aging, workforce metrics)	Leadership rollups; JSON-driven

C2. Risk Management Center (`risk-management.html`)

Offering	Detail
Severity Calculator (live: likelihood × impact)	Interactive: score any finding in seconds
Four-factor AO decision frame (Criticality, Data Category, Connectivity, Compensating Posture)	The AO's mental model, written down
Authorization Priority Score	Triage metric for queue ordering
CVE→Mission Language translator (Technical Finding → System Effect → Mission Degradation)	Speak warfighter impact, not CVE jargon — gold for AODR briefs
Risk registers w/ top risks + quad charts	Ready-made leader artifacts

C3. Inspection & Audit Readiness (`inspection-readiness.html`)

Offering	Detail
Master readiness checklist (documentation + operational)	The IG-day checklist
8-tab artifact binder structure	"Every system, same order" — standardizes the binder
Top recurring findings w/ fixes	Where inspections actually bite

Offering	Detail
Mock-inspection methodology + interview prep	Rehearsal mechanics

C4. Contact/SLA note: dates hard-coded (binder countdown) → JSON-ify in release | MODIFY |

D. WORKFORCE & TRAINING

D1. Workforce Development (`workforce.html`)

Offering	Detail
8140 readiness tiles (91% DCWF-coded / 84% foundational / 11 grace / 37 IDPs)	Monthly-roll numbers — ⚠ hand-coded HTML today; JSON-ify in release
Role deep-dives w/ DCWF codes: ISSO 722/723, ISSM 612, SCA 801/802, System Owner/PM, Engineer, Leadership, Contractor	"Know your lane + your artifacts" — duties + artifact ownership per role
"What Counts, For Whom" (common core: CUI handling, incident notification, Intro to RMF within 60 days)	The everyone-must list
Tools That Move You Forward (links: 8140 Readiness Tracker XLSX, DCWF Work-Role Mapper XLSX, Cyber Range)	The actual worksheets
Mentorship Program (6-month pairings, charter, checkpoints, capstone)	DEVELOP-tier program
Rotational Opportunities (90-day rotations, endorsement + backfill plan)	SURGE-capacity program
ACMA cross-link	Acquisition career path bridge

D2. Training Academy (`training.html`) + Cyber Range (`tools/cyber-range/`)

Offering	Detail
30 courses across 3 tiers (Build the Base / Run the Mission / Lead the Program)	Structured curriculum
31 range course modules (AC-301…AC-331, verified files in repo)	Actual runnable modules in the console
Knowledge checks + 80% capstone per course	Credential-style rigor
"Practice on Fiction, Perform on Fact" doctrine	Range = fiction, prod = fact
"Learn From the Rejection Pile"	Actual rejected-package artifacts as teaching material

D3. ACMA Resource Center (`acma.html`)

Offering	Detail
DACM chartering policy (PDF, official Feb 2022 memo)	Governing doc
What an ACMA is/isn't, who does what	Role clarification
DAWIA certification tiers + CLP rules	Career mechanics
Annual battle rhythm + official-source list (12 ext. links)	Every official link, one page
ACMA Nomination Memo template (DOCX)	Ready to use

D4. Community & Office Hours (`community.html`)

Offering	Detail
5 standing Teams office hours (eMASS Open Lab, RMF Clinic, Vuln & POA&M Surgery, ARB Pre-Brief, Ask the CISO)	Drop-in help, no appointment
4 Communities of Practice (ISSO Forum, Assessors' Roundtable, Cloud & DevSecOps Guild, OT/Standalone Circle)	Peer groups

Offering	Detail
Q2 FY26 Honors	Recognition wall
Weekly Posture	Digest teaser

E. TOOLS, AGENTS & AI

E1. Tools & Systems Portal (`tools-dashboards.html`)

Offering	Detail
Command Center Snapshot (live from site-metrics.json: auth mix donut, POA&M severity bars, nearest expirations, needs-attention worklist)	Same data as home, tool-context
Purpose-built apps: VulneraSight, Aegis.AI, Cyber Range Console, AI Prompt Library	Home-grown suite
The Tools You'll Actually Use: eMASS (access workflow: CAC+CBT+ISSM sponsorship, ~5-day provisioning), ACAS/Tenable, SCC 1.3, STIG Viewer, Power BI, SharePoint/Teams, NICCS	The real toolbelt w/ purposes
Standard Access Workflow (Prerequisites→Sponsorship→Provisioning→Recertification)	The how-to-get-a-tool path

E2. VulneraSight (`tools/vulnerasight/`)

Offering	Detail
Threat-informed analysis: correlates ACAS/Nessus findings + STIG .ckl against threat context; drafts reviewable POA&M narratives	The triage accelerator

E3. Aegis.AI Risk Command (`tools/aegis-ai/`)

Offering	Detail
Executive decision support: portfolio risk posture, budget optimization, AI-drafted authorization memos (human-signed)	The leadership dashboard app

E4. AI & Automation Center (`ai-automation.html`)

Offering	Detail
Rules before tools: Permitted (approved platforms only) vs Prohibited — No Exceptions lists	The AI guardrail policy on one page
5 reviewable-draft prompt patterns (Control Narrative, Policy Plain-Language Summary, POA&M Milestone Decomposition, Tabletop Inject Generator, AAR First Draft) + NotebookLM Study Pack	Copy-ready prompts
Automation intake (Submit→Triage→Build & Govern)	Paper-trail for new ideas
Cybersecurity AI Prompt Library (hosted external app, Cloud Run)	The vetted prompt catalog

E5. Agent Catalog (`agent-catalog.html`)

Offering	Detail
12 approved AI agents w/ purpose + owner + Request-Access email flow: RMF Package Drafter, POA&M Triage Assistant, Threat Intel Synthesizer, STIG Compliance Checker, Risk Memo Drafter, ConMon Collector, Secure Blueprint Generator, Inspection Readiness Validator, 8140 Workforce Mapper, Phishing Analysis, Acquisition Cyber Language, Tabletop Exercise Generator	The AI workforce directory

F. CONTRACTS, ENGINEERING, POLICY, REFERENCE

F1. Acquisition Cyber Support (`acquisition.html`)

Offering	Detail
9-clause library (RMF baseline, secure coding, CUI safeguarding, incident SLA, deliverables list, acceptance criteria, FedRAMP/IL residency, personnel access, departure)	Copy-paste SOW language
Minimum Cyber Deliverable Set + Cost Estimating Guide	What "done" means at delivery
4 acquisition touchpoints (Market Research/RFI, SOW Drafting, Source Selection, Deliverable QA)	Where cyber plugs into contracts

F2. Engineering & Secure Design (`engineering.html`)

Offering	Detail
6 reference architectures that already passed (Three-Tier Enclave, IL4/IL5 Cloud, Standalone/Closed, OT/Range, DevSecOps, XR/Sim)	Not theory — blueprints w/ precedent
Non-negotiables (IAM, Logging, Crypto standards)	Design floor
STIG Execution Handbook	From commit to authorized
ARB intake	Architecture review routing

F3. Policy Library (`policies.html`) — 14 controlled documents, all present as DOCX

RMF Execution Policy v4.0 · Change Management Rubric v3.2 · Continuous Monitoring Parameters v2.7 · Vulnerability Mgmt Windows v3.0 · POA&M Lifecycle v2.4 · Standalone Boundaries SOP v1.8 · Closed Network Audit v1.5 · Cloud Governance IL2–IL6 v3.0 · CUI Handling v2.2 · Incident Response v3.1 · SCRM/SBOM v1.6 · Emerging AI Governance v1.0 · OT/XR/AR/VR v1.3 · Reciprocity Acceptance v1.7 → KEEP ALL (version-controlled, supersede lines on each card)

F4. References & Authorities (`references.html`) — 36 documents, all linked to publisher source

DoD issuances (6): DoDI 8500.01, DoDI 8510.01, DoDD 8140.01, DoDI 8140.02, DoDM 8140.03, Issuances Portal · Army (6): AR 25-2, DA PAM 25-2-14/-5/-9/-12, Army Pubs portal · NIST (15): FIPS 199/200, SP 800-18/-30/-37/-39/-53/-53A/-53B/-60/-137/-160/-171/-172, CSF 2.0 · CNSSI 1253 · MITRE (4): ATT&CK, D3FEND, CVE, CWE · CISA/DISA (4): KEV, KEV feed, DISA STIGs, DoD Cyber Exchange → KEEP ALL

F5. Templates & Artifacts (`templates.html`) — 33 files, every artifact in blank + gold-standard pairs

AO Decision Briefing (EXAMPLE / QUAD CHART / SLIDES) · AO Package Routing Checklist · Artifact Checklists xlsx (full set) · Assessment Readiness Package (BLANK/GOLD) · Control Implementation Statement Frames (BLANK/GOLD) · Cybersecurity-101 trio · Executive Risk Summary RAW (BLANK/GOLD) · FIPS-199 Worksheet (BLANK/GOLD) · HW/SW Inventory (BLANK/GOLD) · Minor Change Memo (BLANK/GOLD) · POA&M Closure Evidence Forms (BLANK/GOLD) · RMF Process Map PDF · Risk Acceptance Memorandum (BLANK/GOLD) · SSP Language Blocks (BLANK/GOLD/GOLD-PDF) · Significant Change Request (BLANK/GOLD) · Boundary & Data Flow (STENCIL/GOLD) · System Divestment Checklist → KEEP ALL (this is the site's single most-used section in any org)

F6. Media Hub (`media.html`) — 8 executive CISO articles + 6 podcast/video series (external links)

External articles (Cyber Magazine, SC World, Gartner…) + AI Security Ops weekly podcast, AI Security Brief, AI Hacks… → REVIEW — these are public-internet thought-leadership, fine on both tiers; keep if you want the CISO "voice" section, cut if you want pure ops focus |

F7. Newsletters (`newsletters/`) — 4 issues (W21–W24, ends mid-June)

Weekly digest archive w/ KEV act-now, binder deadlines, mock-inspection schedule → ⚠ 15 weeks stale — either revive as the comm channel for launch or hide until real. CUT the "4 issues" count from any banner until cadence is real |

H. DOWNLOADS MASTER LIST (verified on disk — 50 unique files)

- `templates/` — 33 files (listed in F5)
- `tabletops/` — 5 files: Ransomware (LOGNET-04), CUI Spill Cross-Domain, Insider Data-Staging, Lost Laptop TDY + ALL.ZIP
- `policies/` — 14 DOCX (listed in F3)
- `tools/` — 2: 8140-Readiness-Tracker.xlsx, DCWF-Work-Role-Mapper.xlsx
- `acma/` — 2: DACM policy PDF, nomination memo template
- `calendar/` — 6 generated .ics

I. INTERACTIVE / DYNAMIC LAYER (the "live site" part)

Mechanism	Status
site-metrics.json → home + tools + governance	✅ working, JSON-driven
ticker.json + auto-KEV insert	✅ working
poam.json → live finding table (⚠ named systems)	✅ working
calendar.json → grid + .ics build	✅ working
threat-week.json → weekly cards	✅ working
6 FAQ modules (207 answers) + pages.json full-site search	✅ working
data/auto feeds (KEV/NVD/MSRC/Linux/Nessus)	✅ FIXED 4 OCT — auto-refresh workflow restored, feeds live (was 116 days stale)
.ics generation (build_ics.py)	✅ pipeline-coupled — needs .mil CI job

---

J. HONESTY AUDIT — verify BEFORE workforce launch (the credibility list)

1. **Office hours / CoPs / mentorship / rotations** — are the Teams meetings real and staffed? An empty calendar link burns trust.
2. **Agent Catalog (12 agents)** — does each agent exist with a real owner? Any "coming soon" must be marked as such.
3. **Training Academy (30 courses)** — 31 range modules exist as files; verify Academy page claims match what's actually deliverable.
4. **Metrics (84/71/12/9, 91%/84%, 312 POA&M…)** — all currently seed values; do the first REAL monthly roll before showing leadership.
5. **Newsletter cadence** — revive or hide.
6. **Placeholder email** — `usarmy.ccoe.office@army.mil` in 3 mailto links → swap before launch.
7. **CUI exposure check (pre-.mil)** — named systems + ISSO identities + POA&M narratives + expiration dates w/ owners: aggregate on public, detail on .mil only.
