CCoE Hub — Your Field Guide: Everything Available to You

For the CPE ST3 Cyber CoE workforce · 10 OCT 2026 · Every tool, resource, site, and data source the hub gives you — the complete list, no truncation.

This is not the inventory of what we're deciding to keep — this IS the release. Everything listed below is live or clearly marked coming soon. Bookmark this document; it's the map of the site.

How to Navigate (30 seconds)

- **New to a role?** → **Day One** (day-one.html) — pick your role tile; each role has its own page: what the job is, the first 10 days in order, the battle rhythm, and your official playbook.
- **"Who do I ask? / How do I…?"** → **FAQ & Knowledge Base** (faq.html) — 207 searchable answers + full-site index search.
- **"Where's the form?"** → **Templates** — every artifact in blank + gold-standard pairs.
- **"Is my system about to expire?"** → **Assessment Calendar** — the expiration radar + Outlook .ics.
- **The one rule everywhere:** *if it wasn't recorded, it wasn't decided* — decisions land in writing (eMASS, ARB minutes, CGB records, POA&M).

A. START HERE — ROLE-BASED DAY-ONE PAGES (10 pages)

Every role in the portfolio has a dedicated onboarding subpage. Each follows the same structure: **What Is My Job** (own / support / escalate + your chain + the Army regulation that defines the role) · **The First 10 Days** (access-and-accounts table in SLA order + the read-first list) · **The Rhythm** (daily → annual battle cadence) · **Resources & Qualification** (on-site toolkit + authoritative sources + your DoD Career Pathway playbook + who to call).

Role page	Your code / authority	One-line job
ISSO	**DCWF 721**	Daily RMF execution — data collection, vulnerability mgmt, POA&M mgmt, eMASS input; **includes former PM-level ISSM billets, now titled ISSO**
ISSM	**DCWF 722**	**One ISSM per organization** — governance, routing, escalation, authorization strategy
System Owner (ISO)	**DA PAM 25-2-14 §3-10**	The appointed ISO — the PM or Product Director; appoints the single ISSM + ISSO cadre, funds remediation, reports posture to the AO
ISSE	**SP 800-160**	Security engineering — inheritance, boundaries, STIG-ability
PM & APM	**DCWF 801**	Mission + resources; cyber in the contract
Product Manager / Owner	**DCWF 803/805**	Increments, backlog security, release posture
Chief Engineer	**DCWF 641**	Technical baseline, ARB, technical risk
Lead Project Engineer	**DCWF 802**	Integration + the evidence pipeline
AO & AODR	**DCWF 611**	Risk acceptance + delegation boundaries
Day One landing (all roles + shared basics)	—	The 60-second org map, access-order matrix, first-60-days plan

The role chain in one line: ISSO → ISSM → AODR → AO, with the System Owner resourcing the work and the ISSE welding security into the design.

Official qualification playbooks linked from every role page: **DoD Cyber Career Pathway PDFs** (611 / 722 / 801 / 802) and the **DAU DCWF Learning Playlists** (per-code training sequences). ISSO + 803/805 formal pathway PDFs aren't published yet — those pages link the official role definitions meanwhile.

B. RMF & OPERATIONS CORE

Page	What you get
RMF Operations Hub	The Seven Steps (Prepare→…→Monitor); **10 authorization pathway cards** (Full ATO, IATT, Conditional ATO, ATC-Only, Assess-Only, Standalone, Closed-Restricted, Agile/Continuous, ATO Extension, Reciprocity) with job aids; downloadable checklists
Vulnerability & POA&M	**The SLA clock** (KEV 7d / CAT I 15d / CAT II 30d / Medium 90d / Low 180d); live open-POA&M aging table from `poam.json` ; the finding→verified-closure engine; evidence rules; escalation triggers; scan cadence
Assessment Calendar	**Expiration radar** (what's expiring and when) + month grid + **6 Outlook .ics files** so the clocks live in your calendar, not your memory
Threat Intel	This Week's Threat Picture; **raw auto-refreshing feeds** (CISA KEV, NVD criticals, MSRC, Ubuntu/Red Hat notices, Nessus plugins — refreshed twice daily, automatic); KEV→portfolio mapping; ATT&CK technique lens
Incident Response	Category/clock tables (spill = immediate / ≤1h ISSM / ≤2h CISO…), the 24/7 incident inbox, call-order card, tabletop exercises

C. GOVERNANCE, RISK & LEADERSHIP

Page	What you get
Governance	The **Oversight Authority Model** (who decides what, where delegation stops); Cyber Governance Board charter + cadence + quorum; **RACI tiles** for RMF / changes / incidents / vulnerabilities; portfolio-in-one-screen dashboards; the Cybersecurity Office's own DCWF 611 playbook inline
Risk Management Center	**Live Severity Calculator** (likelihood × impact); the four-factor AO decision frame (Criticality·Data·Connectivity·Compensation); CVE→**mission-language translator** ("technical finding → system effect → mission degradation" — steal the phrasing for your briefs); quad charts; risk registers
Inspection Readiness	The master readiness checklist; **the 8-tab binder standard** ("every system, same order"); top recurring findings with fixes; mock-inspection methodology + interview prep

D. WORKFORCE, TRAINING & DEVELOPMENT

Page	What you get
Workforce Development Center	Your role deep-dive with artifacts-per-role; **"What Counts, For Whom"** (the common core: CUI handling, incident notification, Intro to RMF — all within 60 days); 8140 posture tiles; mentorship program (6-month pairings) + 90-day rotational opportunities
Training Academy	30 courses across 3 tiers (Build the Base / Run the Mission / Lead the Program), knowledge checks + 80% capstone
Cyber Range	**31 runnable course modules** in the console — the strongest differentiator here. Doctrine: *practice on fiction, perform on fact.* Includes **"Learn From the Rejection Pile"** — actual rejected-package artifacts as teaching material
ACMA Resource Center	The DACM chartering policy; what an ACMA is/isn't; DAWIA tiers + CLP rules; annual battle rhythm + 12 official links; nomination memo template
Community & Office Hours	5 standing Teams office hours (eMASS Open Lab · RMF Clinic · Vuln & POA&M Surgery · ARB Pre-Brief · Ask the CISO); 4 Communities of Practice (ISSO Forum · Assessors' Roundtable · Cloud & DevSecOps Guild · OT/Standalone Circle); Q2 honors wall; weekly posture digest
Media Hub	8 executive CISO articles + 6 podcast/video series for professional growth

E. TOOLS, AI AGENTS & AUTOMATION

Page / App	What you get
Tools & Systems Portal	Command Center snapshot (auth mix, POA&M severity, nearest expirations, needs-attention worklist); **the real toolbelt with purposes**: eMASS (access workflow: CAC + CBT cert + ISSM sponsorship → ~5-day provisioning), ACAS/Tenable, SCC 1.3, STIG Viewer, Power BI, SharePoint/Teams, NICCS; the standard access workflow
VulneraSight	Correlates ACAS/Nessus findings + STIG .ckl against threat context; drafts reviewable POA&M narratives — the triage accelerator
Aegis.AI Risk Command	Executive decision support: portfolio risk posture, budget optimization, AI-drafted (human-signed) authorization memos
AI & Automation Center	**Rules before tools** (permitted platforms vs. prohibited — no exceptions); **5 copy-ready prompt patterns** (Control Narrative, Policy Plain-Language Summary, POA&M Milestone Decomposition, Tabletop Inject Generator, AAR First Draft) + NotebookLM Study Pack; automation intake pipeline
AI Prompt Library	Hosted vetted prompt catalog (Cloud Run app)
Agent Catalog	**12 approved AI agents with named owners + request-access flow**: RMF Package Drafter · POA&M Triage Assistant · Threat Intel Synthesizer · STIG Compliance Checker · Risk Memo Drafter · ConMon Collector · Secure Blueprint Generator · Inspection Readiness Validator · 8140 Workforce Mapper · Phishing Analysis · Acquisition Cyber Language · Tabletop Exercise Generator

F. CONTRACTS, ENGINEERING, POLICY, REFERENCE — THE LIBRARY

Page	What you get
Acquisition Cyber Support	**The 9-clause library** (RMF baseline, secure coding, CUI safeguarding, incident SLA, deliverables, acceptance criteria, IL residency, personnel access, departure) — copy-paste SOW language; minimum cyber deliverable set + cost-estimating guide; the 4 touchpoints where cyber plugs into contracts
Engineering & Secure Design	**6 reference architectures that already passed** (Three-Tier Enclave, IL4/IL5 Cloud, Standalone/Closed, OT/Range, DevSecOps, XR/Sim); the non-negotiables (IAM / Logging / Crypto floors); STIG Execution Handbook; ARB intake routing
Policy Library	**14 controlled documents, all version-controlled DOCX** (RMF Execution Policy v4.0 · Change Mgmt Rubric v3.2 · ConMon Parameters v2.7 · Vuln Windows v3.0 · POA&M Lifecycle v2.4 · Standalone SOP v1.8 · Closed Network Audit v1.5 · Cloud Governance v3.0 · CUI Handling v2.2 · Incident Response v3.1 · SCRM/SBOM v1.6 · AI Governance v1.0 · OT/XR v1.3 · Reciprocity v1.7) — supersede lines on every card
References & Authorities	**36 official documents linked straight to the publisher**: DoD issuances (DoDI 8500.01, 8510.01, 8140.01/.02, DoDM 8140.03), Army (AR 25-2, PAM 25-2-14/-5/-9/-12), NIST (FIPS 199/200 + 15 SPs incl. 800-160, 800-53 series, CSF 2.0), CNSSI 1253, MITRE (ATT&CK, D3FEND, CVE, CWE), CISA KEV + DISA STIGs
Templates	**33 files — every artifact in blank + gold-standard pairs**: AO Decision Briefing (example/quad/slides), routing checklist, full artifact-checklist xlsx set, control-statement frames, risk-acceptance memo, SSP language blocks, significant-change request, boundary stencils, divestment checklist, and more. The single most-used section of the site
Tabletops	5 inject packages (Ransomware LOGNET-04 · CUI Spill Cross-Domain · Insider Data-Staging · Lost Laptop TDY + all-in-one ZIP)
Workforce tool sheets	**8140 Readiness Tracker** + **DCWF Work-Role Mapper** XLSX — the actual worksheets for your IDP conversation
Newsletters	Weekly digest archive (the cadence is being revived for launch)

65 distinct downloadable files are behind these pages: 33 templates + 14 policies + 5 tabletops + 6 calendar files + 2 workforce tools + 2 ACMA docs + others.

G. THE DYNAMIC LAYER (what updates itself)

The site is JSON-driven, not hand-typed: portfolio metrics, the alert ticker (newest CISA KEV items auto-insert), the live POA&M table, the calendar grid, the weekly threat picture, 207 FAQ answers, and the full-site search run off `site-metrics.json` / `ticker.json` / `poam.json` / `calendar.json` / `threat-week.json` / `pages.json` + five auto-refreshed threat feeds. Threat feeds refresh **twice daily automatically** (CISA KEV, NVD criticals, MSRC, Linux vendor notices, Nessus plugins) — restored and verified 4 OCT 2026.

H. QUICK ROUTING (who handles what)

I need to...	Go to
Get eMASS / tool access	FrontDesk — tools-dashboards.html workflow; ~5 business days, sponsor = your ISSM
Ask a RMF "how do I" question	FAQ first, then the **RMF Clinic (Wednesdays 1400–1500, Senior ISSM)**
Report an incident	**NOT the contact page** — the 24/7 incident inbox / incident-response.html call order
Raise a risk question for a brief	AODR office + the Risk Center translator
Request an AI agent or automation	Agent Catalog → the agent's owner; governance via AI & Automation
Ask the CISO anything (anonymous)	contact.html — answered live last-Friday monthly or within 2 weeks; general answers publish to the FAQ
Escalate	ISSO → ISSM → AODR → CGB → CISO → AO (skip levels only for active incidents)
